About Me

I am a Computer Science and Engineering (CSE) undergraduate at **Jashore University of Science and Technology (JUST)**, with a passion for **Software Development**, **Artificial Intelligence**, and **Machine Learning**.

I enjoy building innovative and impactful applications that solve real-world problems. My goal is to master advanced programming concepts and explore cutting-edge technologies to push the boundaries of innovation.

Projects

A collection of my recent projects.

Anonymous Chat App

Features

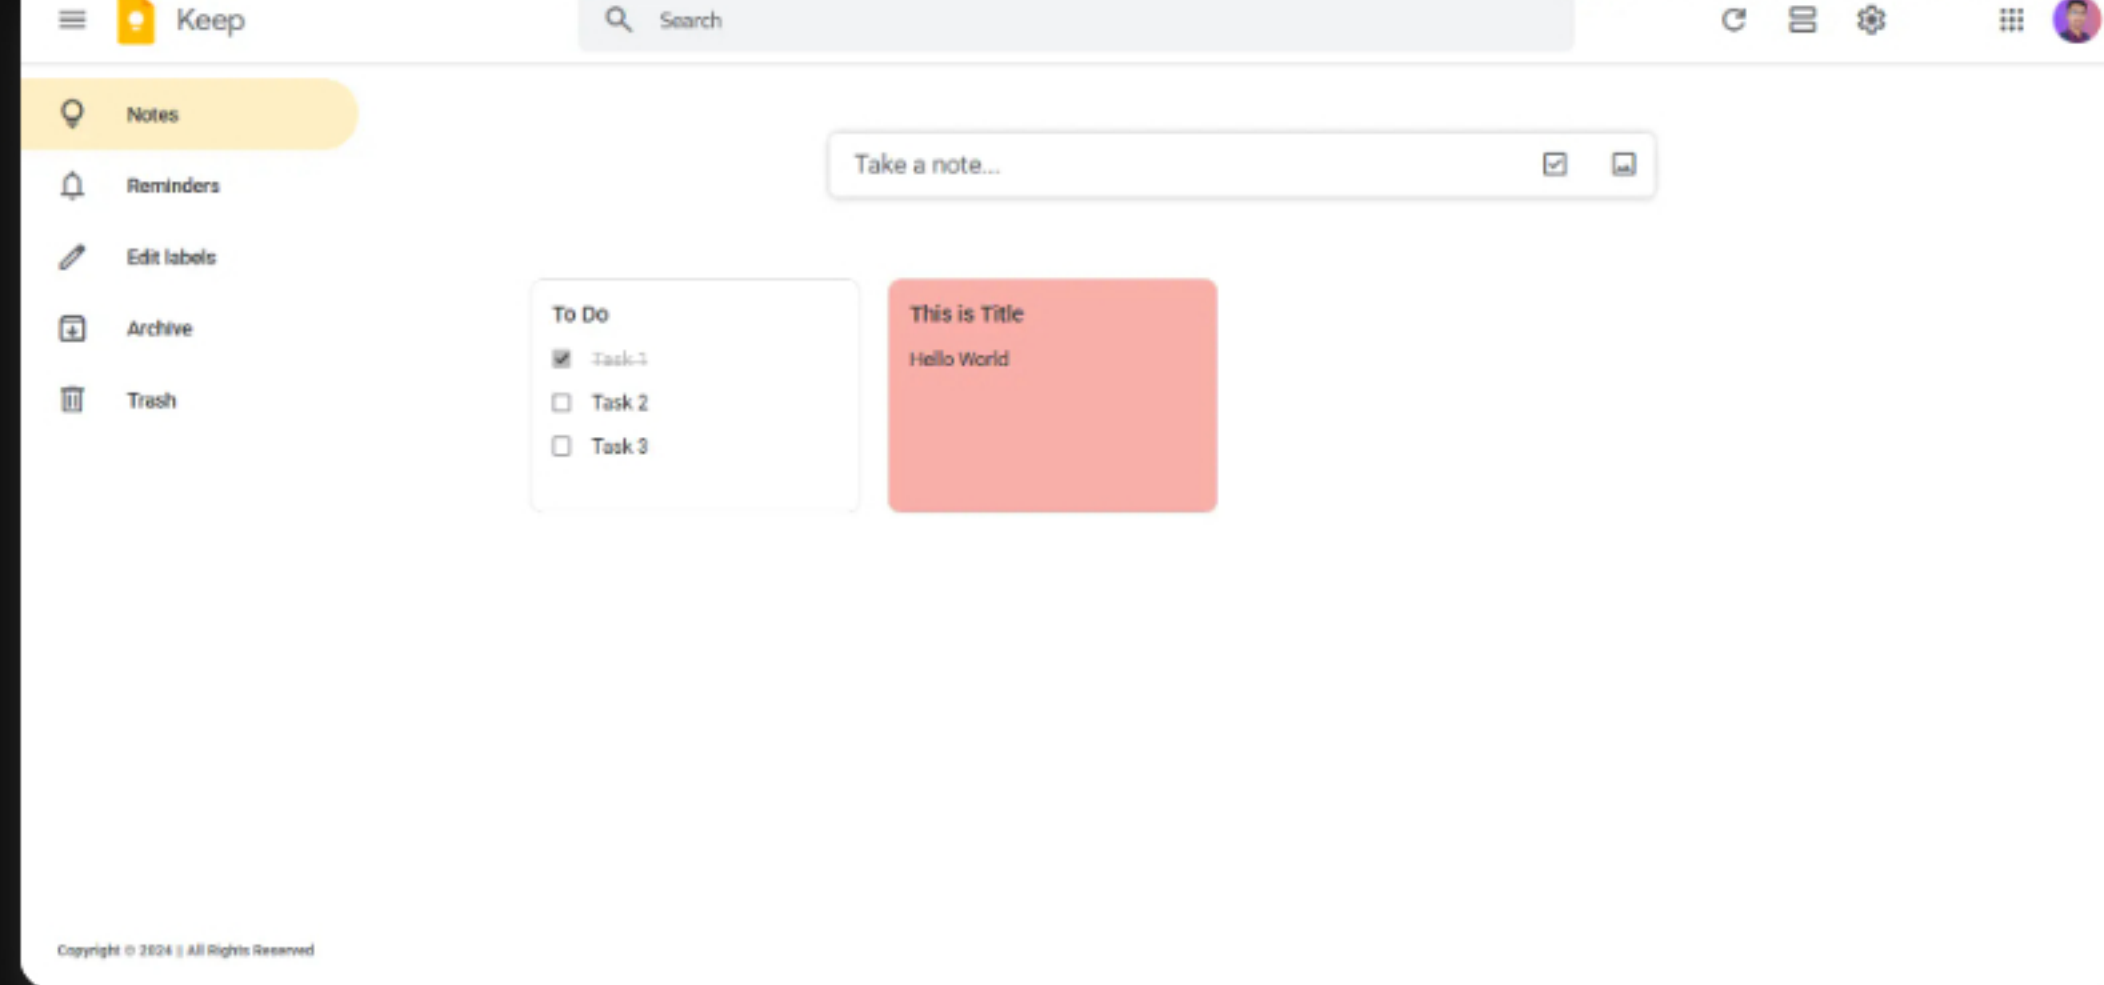

- » Receive messages from anyone without exposing identity.
- » Sign in with Google via Firebase Authentication.
- » Unique username generation for each user.
- » RSA encryption for secure messaging.
- » Pause the link to stop receiving messages temporarily.
- » A modern and user-friendly design to enhance user experience.

[React.js](#) [React Router](#) [Redux](#) [Firebase](#) [Real-time Database](#)[Firebase Auth](#) [RSA encryption](#)[Live Site](#) [View Code](#)

Portfolio Website

Features

- » Responsive design for all devices.
- » Dark mode toggle.
- » Interactive and user-friendly UI.
- » Optimized for performance and SEO.
- » Modern and clean design.

[React.js](#) [SASS](#) [React Router](#) [Firebase](#) [Real-time DB](#) [Firebase Auth](#)[Live Site](#) [View Code](#)

Google Keep Clone

Features

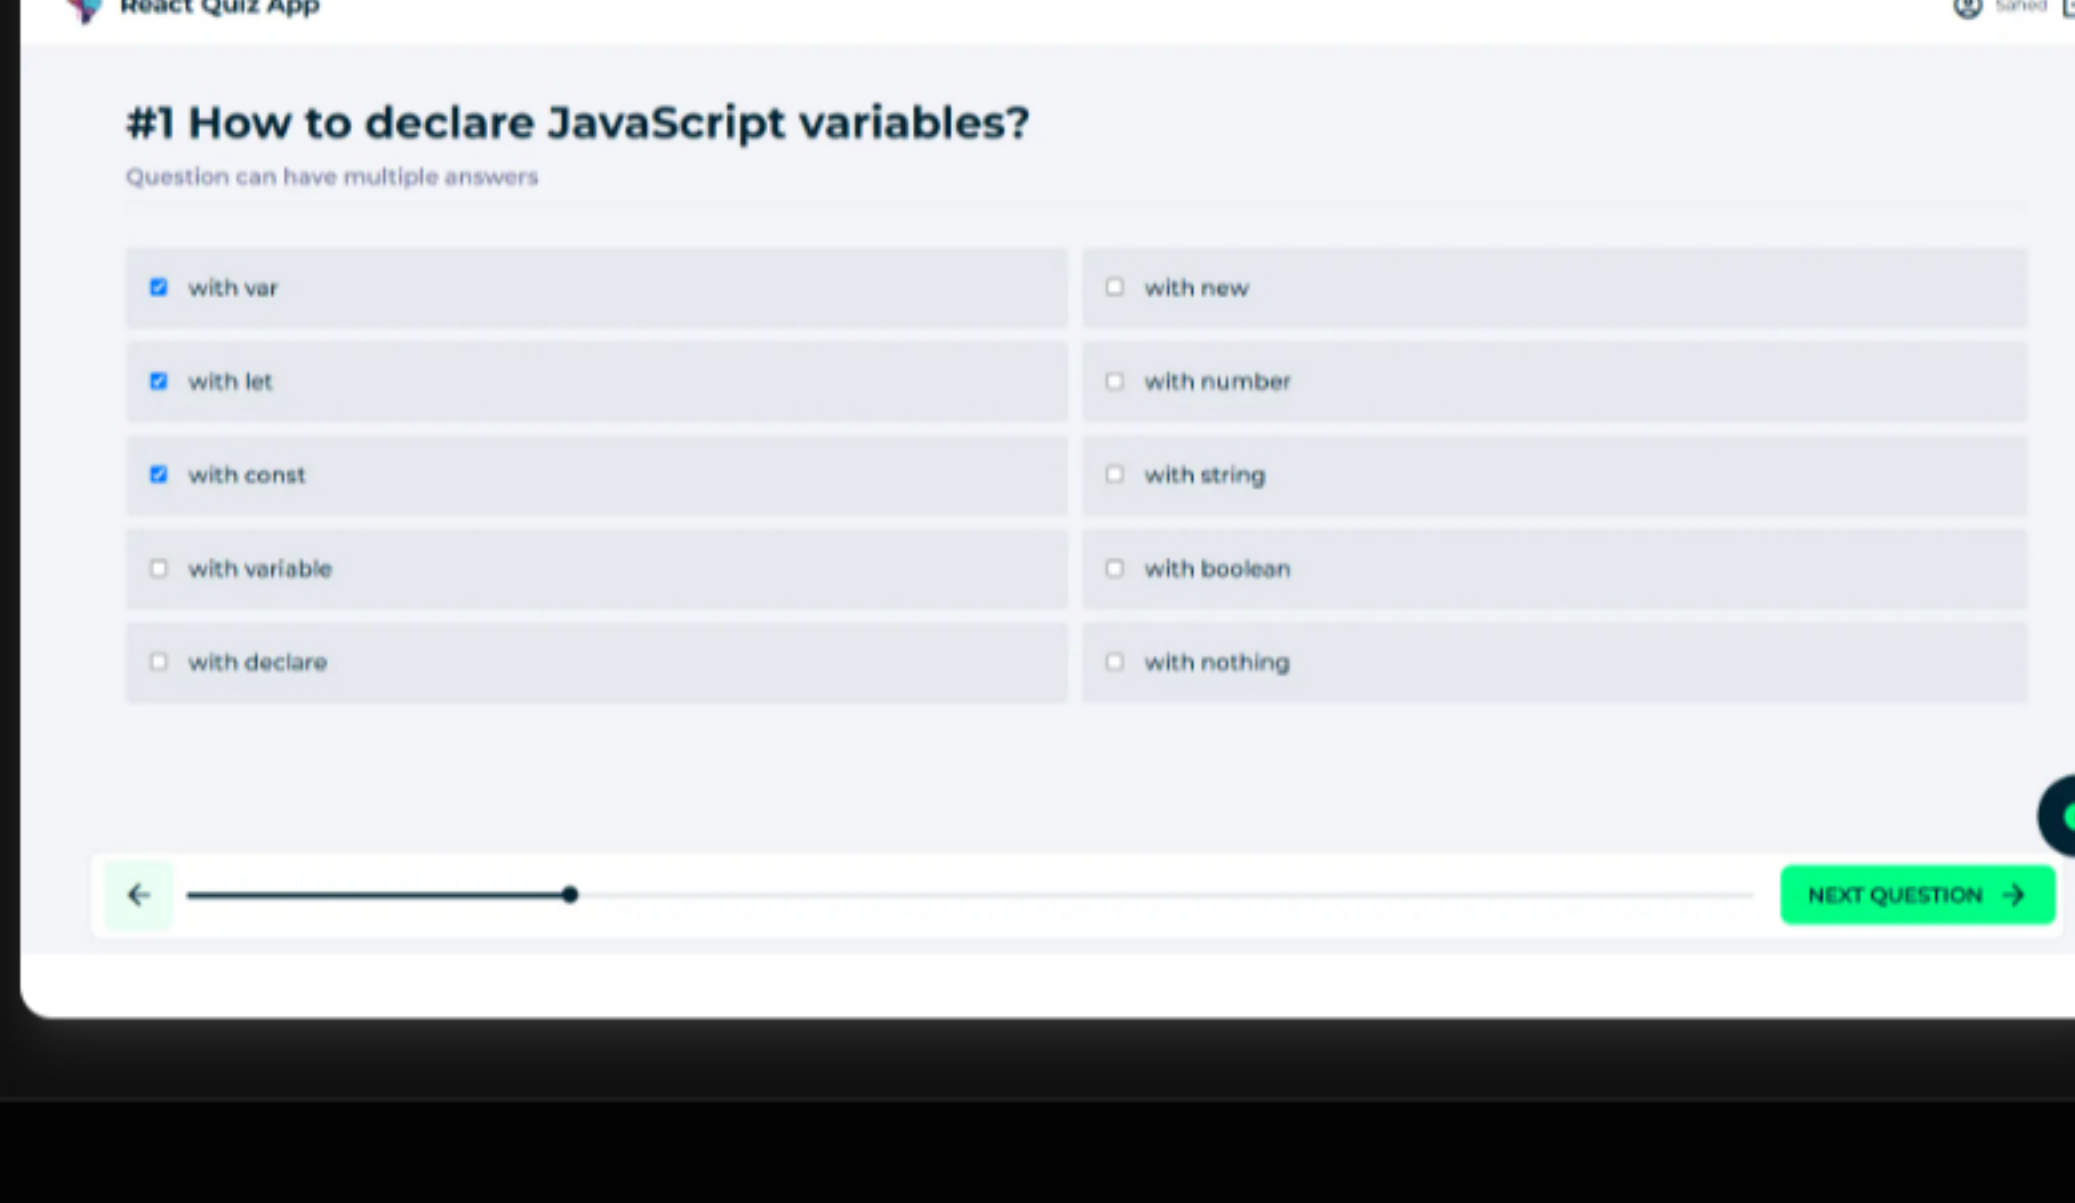

- » Fully responsive design
- » Sign in with Google, Facebook, GitHub, or Twitter via Firebase Authentication.
- » Create, edit, and delete notes.
- » Real-time updates with Firebase Realtime Database.

[React.js](#) [SASS](#) [React Router](#) [Firebase](#) [Real-time DB](#) [Firebase Auth](#)[Live Site](#) [View Code](#)

React Quiz App

Features

- » Multiple choice questions.
- » Score tracking.
- » Responsive design.
- » Sign in with Google via Firebase Authentication.
- » User-friendly and intuitive UI
